- Secured 2nd in Web Design at Intra departmental event.
- Reached top 5% in Web Design event by Unstop & NITT
- Secured 1st on content creation under the domain Cloud computing and Web 3.0

PROJECTS

Auditorium Booking System:
Auditorium booking software with access for the users and admins with separated environments. Users can book contact and see the status of the venue booking while the Admins can check for the approval or denial .It has a user-friendly Interface.

Flight Booking App UI:
Developed a clean and user-friendly UI for a flight booking app. The interface has been designed with simplicity and ease of use in mind, ensuring that users can navigate through the app effortlessly. The clean UI enhances the overall user experience and makes the flight booking process seamless. Also designed UI for e-Education App and E-Car Accessibility
